ALUMINA

CODE: 2818.20.10.00.

Alumina is aluminum oxide. Together with silica, it is the most important component in the constitution of clays and glazes, giving them resistance and increasing their maturation temperature. Aluminum oxide exists in nature in the form of corundum and emery.

TARIFF DESCRIPTION

calcined alumina

UNIT MEASUREMENT

Kilograms.

PRESENTATION

Bags.

EMPRESAS EXPORTADORAS

One (1) Miranda

OFFERABLE QUANTITY

58 Tons per year

APPROX EXPORTABLE OFFER

\$ 11.450.000,00 (2020)

METALLURGICAL

Product:

SULFATE OF ALUMINUM

CODE: 2833.22.00.00.

Aluminum sulfate is a salt of formula, it is solid and white and brown in the case of type B aluminum sulfate. It is widely used in industry, commonly as a coagulant in the purification of drinking water and in the paper industry.

TARIFF DESCRIPTION

OFFERABLE QUANTITY

2.000 tons per year.

APPROX EXPORTABLE OFFER

\$ 294.000,00 (2020)

METALLURGICAL

Product:

CARBON BLACK

CODE: 2803.00

It is an inorganic and colloidal material produced by the incomplete combustion of natural gas or other petroleum products. It is also known as soot black, carbon black, acetylene black, lamp black, furnace black, channel black, thermal black, or gas black depending on the process that produces it. Carbon black is made by a certain form of combustion that allows the flame to strike a cold surface, leaving a black residue. This residue is later collected as carbon black.

TARIFF DESCRIPTION

Carbon.

MEASUREMENT UNIT

Kilograms.

PRESENTATION

Bulks.

EMPRESAS EXPORTADORAS

One (1) Carabobo.

OFFERABLE QUANTITY

2.300 Tons per year.

APPROX EXPORTABLE OFFER

\$ 1.820.000,00 (2020)
